The tent series manufactured under the **EXTREME** brand is suitable for most natural and weather conditions thanks to its features and parameters. Tents in this series are designed not only for expeditions and hiking, but will satisfy every traveller that requires top quality and modern materials. Tents in this series have a bearing poles which provides easy set up even in unfavourable weather conditions - strong wind or rain. The high water column of the used material ensures comfortable sleep, whether it is dry and rainy and snowing. Tents in the EXTREME series are usually fitted with snow collars for use in winter. EXTREME series tents have been tested in the most demanding conditions - from the Himalayas to the windy and sandy Andes and North African Sahara. Yet you are sure to appreciate their benefits even during normal camping.

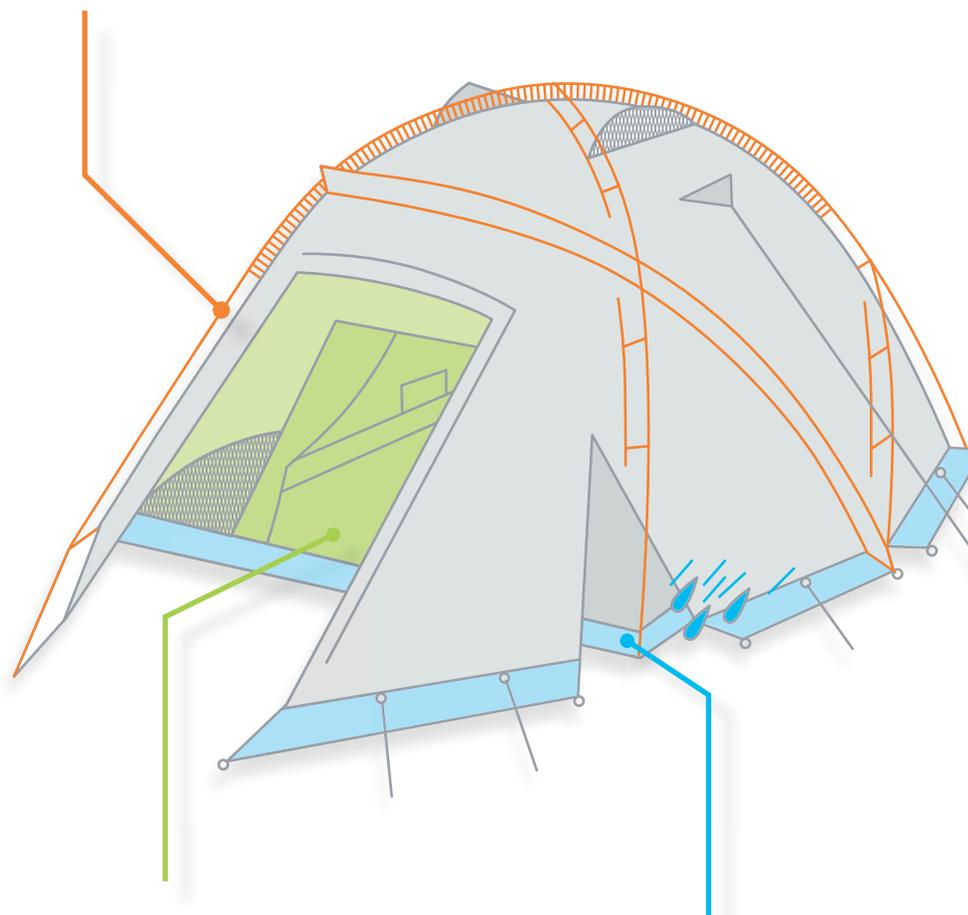

EXTREME LITE is a series that combines the modern technology of the EXTREME line and the excellent value for money of the OUTDOOR series. Unlike the EXTREME line, it features a standard inner construction with duralumin bearing poles, and there are no snow collars, which helps decrease the weight of the whole tent. Tents in this series can be used for climbing, trekking and cycling, in addition to the usual camping by customers that demand high quality and value. This range includes one more section called **ULTRALIGHT**. These tents are specific because of the used fabric and coating. They feature silicon coating instead of PU which is why they are truly ultralight.

The tents from **OUTDOOR** line are our most universal category of tents. They are designed primarily for traditional camping, weekend stays in nature and boating trips. They are equally useful in campgrounds or in the wild and no whims of the weather will surprise during it spring, summer or autumn.

There is only one word to characterise **FAMILY** series tents - space! There is enough room for sleeping at campgrounds or in the wild for the whole family or group of friends. When developing the tent, we didn't just emphasise size, but fast and easy construction as well, given the family designation.

BEARING CONSTRUCTION

The outer duralumin construction protects the inner space when building in unpleasant weather and anchors the tent immediately upon construction. All this ensures greater stability while keeping the structure light and firm thanks aluminium poles.

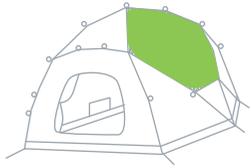

COVERED ENTRANCE

enables efficient air ventilation even in bad weather conditions.

WATERPROOF FLOOR

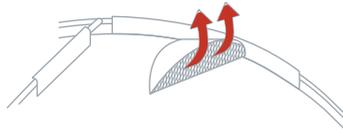

INNER TENT

Made of breathable nylon 190T and mesh mosquito net.

VENTILATION

Draws precipitated vapour away from inner side of tent and decreases the temperature inside when it is hot outside.

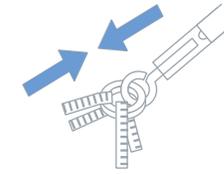

OUTER TENT - FLY SHEET

The used fabric with Polyurethane coating ensures the firmness and waterproofness of the tent.

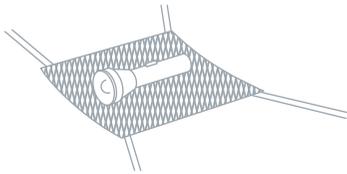

ANCHORING OF THE TENT

Tent anchoring using a spike enables the best possible quality and lifetime in high demanding conditions.

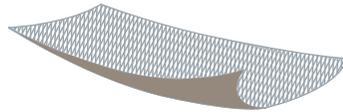

STORING NET

Serves to store your accessories.

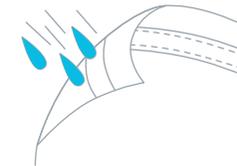

RIPSTOP FABRIC

Has great mechanical damage resistance features and prevents further ripping even if torn.

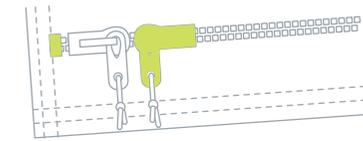

TAPED SEAMS

Guarantee protection against the moisture, extending the lifetime of the tent.

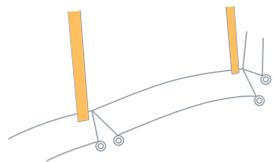

TWO-WAY ZIPPERS

Enable comfortable and two-way handling of the zipper.

ROLLABLE SNOW COLLARS

Ensure maximal stability in windy weather when weighed down and better air circulation when rolled up.

COMPRESSION SACK

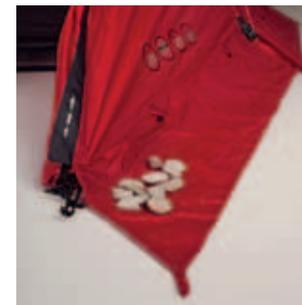

With two compression straps.

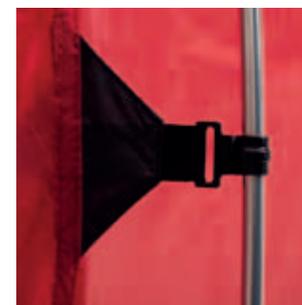

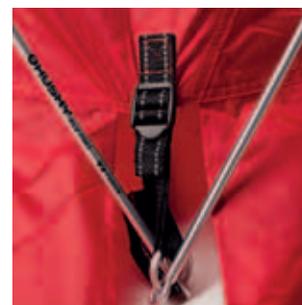

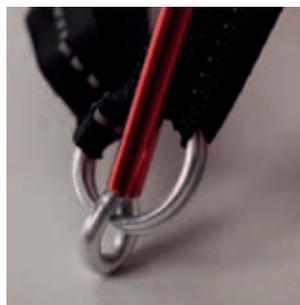

1 SNOW COLLARS

Snow collars take care for maximum stability such as a tent in strong winds when they are weighted down. When they are rolled up, the natural air circulation is increased and thus it improves the tent's ventilation.

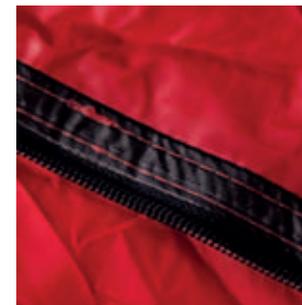

2 FIXATION OF CONSTRUCTION

The outer duralumin construction is anchored by means of tunnels and hooks to fly-sheet. The end of a pole is set to spike. This system is suitable for extreme conditions.

TAPED SEAMS

All exposed seams of the tent, which are on the fly-sheet, are taped. The taping protect against getting soaked and thereby extend the life of the tent.

COMPRESSION SACK

The compression sack protects the tent against damage during transport. Compression straps ensure decreasing of a volume to a minimum and is also easy to handle packaging. There is a repair kit, a part of a sack, with replacement materials such as s glue, a segment of a pole, fixation components and instructions.

INNER SPACE

The inner tent is made of breathable Nylon and mesh mosquito net. This combination of materials was chosen in order to reduce moisture in the tent. The source of moisture inside the tent are its people as well as their stuff, but also humidity of air and ground. With breathable inner tent material, the moisture precipitates to the outer tent. In the space between the inner and outer tent, air can circulate and dries out the tent. Drops of water which are even precipitated, run down the inside of the bedroom and fly sheet will stay dry. The standard equipment of sleeping room are side pockets and storage net for any small things. The tent Husky Fighter 3-4 has covered entrances which creates storage space, while allowing ventilated tent with an open door in the rain or snow.

FIGHTER 3-4

COLOR: 1 red, 2 green

FIGHTER WHICH WILL NOT REFUSE ANY CHALLENGE

The Fighter tent is a real uncompromising champion in the true sense. It feels as the best at high up of snowy mountains, but is ready to protect you from unfavourable weather anywhere and anytime. Its fourchannel duralumin construction guarantees a high level of stability even in very strong wind. Ideal for expeditions, alpinehiking, and demanding trekking trips.

FELEN 3-4

COLOR: 1 red, 2 green

SPACE ABOVE STANDARD WITH DURALUMIN CONSTRUCTION

Speciality of this tent is fixation system of bearing poles with outer construction. This is based on a combination of textile tunnel fixation and buckles from chilled plastic material. This kind of fixation makes for easy and quick set-up even in extreme weather conditions. The Felen tent disposes of excellent stableness and has two entrances into big vestibule. Great choice for everybody who is looking for a high-quality duralumin construction and big space for year-round usage as well.

TENTS • EXTREME

FELEN 2-3

COLOR: 1 red, 2 green

SMALL BROTHER OF SUCCESSFUL FELEN 3-4 IN HUSKY COLLECTION

Felen 2-3 uses same construction like the Felen 3-4 because it offers spacious hall and well-tries bearing poles fixation which combines tunnel and buckle catching. This kind of the fixation makes for easy and quick set-up even in extreme weather conditions. This all enable a perfect stability of the tent anytime and will satisfy you on all adventures.

FALCON 2

COLOR: 1 green

YOUR PARTNER FOR EVERY ADVENTURE

The Falcon is a tent for those who like traveling as a couple or in pair. Its low weight will really be appreciated by all of those who carry the tent on their backs. It is roomy enough to accommodate two people as well as their backpacks. Two entrances make for comfortable handling of all possible articles and assure ideal accessibility. The Falcon is also very practical because of its simple construction that you'll have built in no time at all. Suitable for rock climbers and alpine hikers.

BROM 3

COLOR: 1 green

A NEW TUNNEL MIRACLE IN HUSKY LITE COLLECTION

The Brom in Extreme Lite range is developed for 3 people. This item is specific because of used tunnel construction which creates great space as well as enables to reach low weight against the classical crossed selfstanding construction. There are also used great materials and duralumin bearing construction. This novelty is suitable for cycling trips or usual trekking.

TENTS • EXTREME LITE

BRONY 3

COLOR: 1 green

A DIMENSION OF SPACE

The Brony tent is another model in Extreme Lite range and offers a new element in a construction. Mentioned construction has an omega shape which creates more space in the inner room, especially in its upper part and thus it offers comfortable handling and movement inside the tent. This unique property is complemented by the use of quality materials and light duralumin bearing construction, and it makes it an interesting tent for any kind of outdoor use for 3 people.

DIMENSIONS (W × L × H) • 165 × 340 × 130cm

TENTS • EXTREME LITE

BEAST 3

COLOR: 1 green

A TENT THAT CAN BE BUILT WITH YOUR EYES SHUT

The Husky Extreme range has been enriched by this user-friendly model, in which the principal priority is an attractive balance between quality and price. The inner duralumin construction significantly lowers its weight and the high-quality RipStop fly-sheet offers the guarantee of a good investment for a trio of travelers that enjoy cycle touring and trekking or simply just camping around.

TENTS • EXTREME LITE

BRIGHT 4

COLOR: 1 green

EASY CONSTRUCTION – GREAT SPACE

Like the Beast, the Bright model has an inner duralumin construction, under which up to four highlanders can spend a comfortable night. A third contractible pole maximizes the space that can be used in both vestibules. This new green colour combination will let you merge with nature. Rock climbing, hiking, trekking.

1 BEARING CONSTRUCTION

This model has an atypical attachment of inner and outer tent, between these two layers is the tunnel for bearing poles and it is permanently sewn to both fabrics. The big advantage is the low weight of this construction that is very important and of course there is also an advantage, which is typical mainly for outer construction, and that even in the setting it up in unpleasant weather, the bedroom kept dry even there is used inner construction.

2 PICTOGRAMS

Reflective pictograms don't only inform about the features of tent but they can also help you to find the tent in the night.

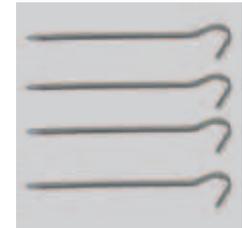

3 VENTILATION WINDOW

The necessity are ventilation windows on the tent fly sheet. The tent has totally two of these windows, which are opposite each other and when opening, it helps to easy air circulation. Another option of ventilation is to open the main entrance that ensures quick and efficient ventilation.

PEGS

The pegs are used to anchor a tent on the ground. They are made from dural as well as the bearing construction to achieve the lowest total weight if the tent.

INNER SPACE

Inner part of the tent offers a sheltered space in the vestibule which serves for easy hiding of all things. The entrance to the inner tent has two layers. One layer is from breathable Nylon and the second layer is mesh mosquito net which is necessary for hot summer nights. Inside the tent, you will find a systém of pockets for storing of small items and there is also care label where you can find basic information on how to take care of the tent.

FABRIC

Husky Sawaj Ultra 2 excels by used ultra light materials. It is the 20D ripstop nylon with a silicone coating on both sides. Nylon itself is very lightweight and strong and ripstop kind of fabric also protects against unpick in the case of tear. The advantage of silicone coating is better mechanical properties of the fabric and better resistance to low temperatures. There is also lightweight and breathable Nylon, used on the inner tent.

PACKAGE

Sawaj Ultra 2 is the lightest tent in the Husky collection. With its total weight of 1.9 kg is unsurpassed. This incredibly low weight is achieved with use of top materials, silicone coating on both sides, duralumin bearing poles as well as tent construction. Despite this tent has enough space in the bedroom and the hall for needed storage of necessities. The total size of the package is only 42x14cm. Therefore, you can take it anywhere and will not be a burden.

SAWAJ ULTRA 2

COLOR: 1 green

SAWAJ ULTRA 2, THE LIGHTEST HUSKY TENT EVER.

The main advantage of this tent is very low weight which makes this tent one of the top products. Extreme minimal weight was reached thanks to used materials like ultralight nylon and accessories and duralumin construction. This all is completed by both side silicon coating. And it makes nice and small packet from the tent which can be easily taken everywhere. The next big advantage are shorter segments of bearing poles which makes the whole package of tent shorter. This tent is for all outdoor activities where each gram is important.

DIMENSIONS (CW × L × H) • 100 × 285 × 115 cm

BURTON 2-3

COLOR: 1 green

YOUR WEEKEND HOME

This double-shelled tent with two entrances has been improved by the addition of a third pole to the classic two pole inner construction system, yielding a more stable and taut shelter. A spacious and comfortable tent for two, occasionally used for three people, the Burton will prove to be an ideal companion for your weekend travel.

TENTS • OUTDOOR

BIZON 3

COLOR: 1 green

THREE MEN IN A TENT AND THE BAGGAGE TOO

The effort to find the most practical tent for three in HUSKY Outdoor range is the Bizon 3 tent. The traditional three-pole construction gives enough space in the vestibule for baggage and/or for cooking purposes in rainy conditions. With this typical three-season tent you can easily sleep comfortably on adventures lasting much longer than just a weekend.

BROMER 4

COLOR: 1 green

COMPACT FAMILY TENT SUITABLE FOR CYCLISTS AS WELL

Model for 4 people is suitable option for those who don't prefer classical big family tent and turistic tent is not big enough. This item is exact compromise between these two requests. With the total weight it surpasses all family tents and even that it offers great space for 4 people and their baggage including the bikes. Two entrances into the vestibule are a matter of course.

DIMENSIONS (W × L × H) • 260 × 460 × 155cm

DIMENSIONS OF PACKAGE • 55 × 18cm

WEIGHT MINIMAL / TOTAL • 6,8 kg / 7,3 kg

CONSTRUCTION

• double-shell tunnel tent with outer construction

FLOOR

• 190T Polyester, PU coating 5000mm / cm², taped seams

OUTER TENT

• 190T Polyester, PU coating 3000mm / cm², taped seams

BEARING POLES

• durawrap poles with ø 8,5mm

INNER TENT

• breathable Nylon 190T+ mesh mosquito net, 1 room

ACCESSORIES

• set of steel pegs, repair kit, compression sack

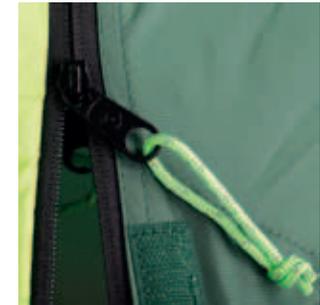

1 INNER SPACE

The inner tent is made from a breathable Nylon and mesh mosquito net. It creates a safe shelter for 5 people and it is suspended on inner part of fly-sheet. There is outer pocket system in between of two entrances into inner room. And inside of inner room there are also pockets on both sides which are really necessary in the tent for 5 people.

2 ZIPPER

The tent is equipped by two-way zippers which enable easy and two way handling with the zipper. The zipper pullers have reflective points for visibility in night.

3 BEARING CONSTRUCTION

The tent Brozer 5 is equipped with reinforced durawrap construction with a diameter of pole 11mm. Durawrap poles are, in the fact, laminated poles with a special polyester foil that fits closely and strenghtens the surface of poles. There is longer life-time, firmness and elasticity as well when using durawrap instead of laminated poles. In the case that the poles will be broken, it will fray only at the site of a break, not along its entire length.

4 FIXATION AND ANCHORAGE

For each family tent is important enough fixation and anchorage as the surface of the tent is big and a gust of wind would have to fell it when badly anchored. Therefore, there are anchor strings on the tent, on the construction and on walls as well so that it can be perfectly anchored. These ropes have woven reflective stripe, so it is easy to find them in the dark and there is no collision.

ENTRANCES

The family tent Husky Brozer 5 has two entrances. The front entrance is main connection between the bigger vestibule and inner room. The back door creates a sheltered space above the inner entrance and that is used mainly for storage of backpacks and other stuff or possible quick escape. These two entrances placed against each other, have a air circulation property. If both open, it is possible to draft a quick and effective ventilation of the tent.

CONSTRUCTION

This family tent has a combined construction which is suitable mainly for traditional camping. There are two crossed poles as a basic element of this construction. Thanks to this crossing, the tent is a highly self-standing and enable easy handling either by setting up or by event moving. There is added a third poles to the tent which increase the interspace between the inner and outer door and creates such a large vestibule that can serve as a daytime shelter from bad weather or hot sunny days.

BROZER 5

COLOR: 1 green

SINGLE TENT IN FAMILY LINE

The Brozer model is a tent for 5 people with self-standing crossed construction. This model has self-standing construction, which enables easy handling and manipulation when you set it up, which you can do quickly without any complications. This tent, for 5 people, offers comfortable space for sleeping and also hiding in a vestibule.

DIMENSIONS (CW × L × H)	• 340 × 440 × 160 cm
DIMENSIONS OF PACKAGE	• 65 × 24 cm
WEIGHT MINIMAL / TOTAL	• 9 kg / 9,6 kg

CONSTRUCTION	• double-shell single tent with outer construction
---------------------	--

FLOOR	• 195T Polyester, PU coating 5000 mm / cm ² , taped seams
--------------	--

OUTER TENT	• 190T Polyester Ripstop, PU coating 3000 mm / cm ² , taped seams
-------------------	--

BEARING POLES	• reinforced durawrap poles with ø 11 mm
----------------------	--

INNER TENT	• breathable Nylon 190T + mesh mosquito net, 1 inner room
-------------------	---

ACCESSORIES	• set of steel pegs, repair kit, compression sack
--------------------	---

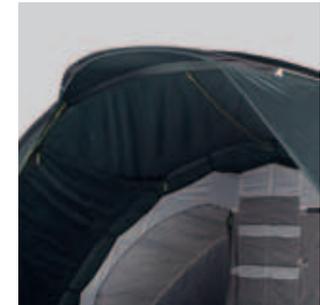

1 VENTILATION WINDOW

The tent husky Baul has 3 large ventilation windows. Two of them are located at the front side of fly-sheet, the part where is the vestibule. And the third ventilation window is on back side of the tent. This third window is primarily used for ventilation of the bedroom. While the other two windows are used for both, ventilation of sleeping area and ventilation of vestibule in hot summer days. At the same time, these two windows regulate the light in the vestibule, so you can have enough light for any activity inside of the tent even the main entrance is closed.

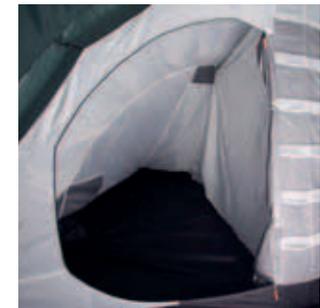

2 COVERED ENTRANCE

The duralumin pole, curved above the entrance, increases covered space of vestibule that can be comfortably used to sit in rainy days as well as for storage of all stuff. You can also use waterproof floor, made from Polyester, to put it on the ground and simply fix it to sides of fly-sheet.

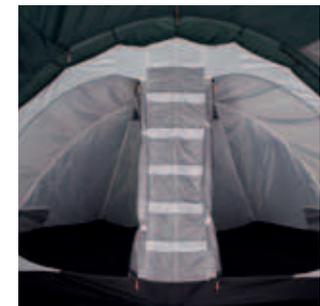

3 INNER ROOM

The inner room of tent husky Baul is changed inside the fly-sheet. The used materials, breathable Nylon and mesh mosquito net, ensure a peaceful and undisturbed sleep and necessary air ventilation and moisture output out of the bedroom. For a quiet and more privacy overnight, there is a dividing wall inside of inner room. However, if you search for a common space, the wall can be simply rolls up and fixed to the side-entrance and you have whole space of inner room available. On the sides of inner space, there are also pockets for small things.

POCKET SYSTEM

Husky family tents are designed for long-term camping, and therefore have the necessary equipment for storage of all needed things. There is a system of pockets in between the divided entrance to vestibule which is designed exactly for this purpose. It is not necessary to add additional storage furniture, the system of pockets inside the tent is fully sufficient.

BAUL 4

COLOR: 1 green

BEARING CONSTRUCTION

For easy handling when setting it up, the bearing poles have colour marking as well as its counterpart on fly-sheet. The correct tip is easy to find by colour marking. The material of bearing construction of Baul 5 is a durawrap. This kind of material is laminate, covered by polyester foil, which surrounds the pole and strnghtens its surface, which gives it greater strenght and flexibility.

CONSTRUCTION

The Baul tent for 5 people has a classical tunnel construction. The advantage is quick and easy construction that always needs to be anchored. This construction uses well the space of inner tent. Sleeping area is located in the low part of the tent, but hall, with its inner height 190 cm, is fully walkable.

YOU CAN FEEL LIKE AT HOME IN TENT'S VESTIBULE

Comfortable tents are typical for their high and spacious vestibule which won't compel anybody to bend his back by entrance to tent. Big advantage of those tents is really simple construction. you are able to set it up easily in few minutes just because of this construction.

DIMENSIONS (CW × L × H) • 270 × 430 × 190 cm

DIMENSIONS OF PACKAGE • 65 × 24 cm

INNER TENT

• breathable Nylon 190T + mesh mosquito net, 1 inner room

ACCESSORIES

• set of steel pegs, compression sack, repair service kit, detachable floor

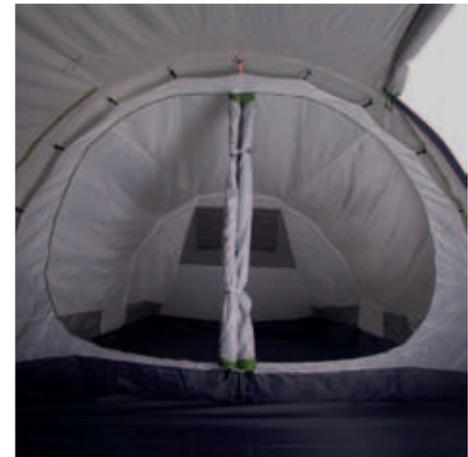

1 VENTILATION WINDOW

The tent Husky Bonet 5 has several ventilation windows which serve to facilitate the air circulation, inside the tent and following output of moisture and heat which arises very easily inside the tent.

2 BIG INNER ROOM

Large bedroom from breathable fabrics is made for 4 people and is hanged out by the olives on the inner side of fly-sheet. The advantage of this hanging out is easy set up and a sureness of dry air even in rainy days. The floor of the inner tent is made of waterproof polyester with PU coating 5000mm/cm² which just ensures required waterproof property. Inside of bedroom is complemented by a system of pockets and care label and basic maintenance notice.

3 SMALL DETACHABLE ROOM

Detachable small room of Bonet 5 is generally the second inner room of this model which serves as an additional space for 1 person or as storage space for all the baggage. The material of inner room is made of breathable Nylon and mesh mosquito net which ensure necessary ventilation. Of course, there is a two-layer inner entrance, consists of one layer of breathable nylon and mesh mosquito net that can be used on hot summer days as closing the tent from insects.

INNER TENT
 • breathable Nylon 190T + mesh mosquito net, 2 inner rooms

ACCESSORIES
 • set of steel pegs, compression sack, repair service kit, detachable floor made of layered polyester

1 CONSTRUCTION

The Husky tent Boston 6 has combined construction. This construction is an ideal choice for longer camping. The crossed construction protects the vestibule and offers comfortable space and total high. And additional tunnel construction protects the inner room and it is fully sufficient for overnight sleeping and movement in the inner room. Of course this model fulfills all parameters of family tents. The fly-sheet is made from firm and durable fabric which is waterproof and its water column is 5000mm/cm², made from Polyurethan coating. This fabric also has UV protection which avoid colour fastness and it also protects the water coating. The tent has a reinforced durawrap bearing construction with diameter 11 mm.

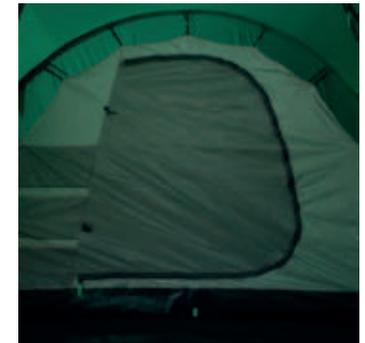

2 VESTIBULE

The central vestibule of the tent has detachable floor from layered Polyetyhlen which is waterproof. The floor can be easily took out and fixed back again according to need. The area of sheltered vestibule can be easily enlarged by standing the door up and supporting by steel poles. Thanks to the total height of the tent, 200 cm, the vestibule is fully walkable.

INNER SPACE

This model is designed for 6 people and there are two inner rooms. The bigger one, with the site 260x210cm, is for 4 people. The smaller inner room with its size 260x130cm is for 2 people. Both bedrooms offers comfortable space for sleeping and have necessary storing space, placed in both inner room and vestibule as well. This storing space will be appreciated by longterm but also by short camping.

DETACHABLE FLOOR

Boston for 6 people has a great ventilation system that consists from usual ventilation windows on side of the tent as well as from detachable small roof on the top of the tent. Side ventilation openings are designed mainly for air circulation of both inner rooms. The ventilation at the top of the roof is placed above the central vestibule and can ensure required circulation of air for the case that the doors can not be opened.

CARAVAN 17

COLOR: 1 green

YOUR PARTNER FOR EVERY ADVENTURE

The Caravan tent is the first representative of a new line of tents, Caravan tents. Number 12 shows the area that this unique model offers, synonymous is therefore simply SPACE. The dimensions offers a fully walkable height and freedom of movement inside of tent. The spacious entrance hall has a fully sewn-in groundsheet to the flysheet of the tent, so that is like a full room. The bearing construction combines lighter durawrap poles with firm steel poles, the result is a stable construction with a reasonable weight. This model is developed for long-term using, so you will find enough storage space there as well as output and fixation for power cable. The tent is ventilated well and all the walls of the hall have transparent windows with covering options. This tent is suitable for camping with family or friends.

UNIQUE SPACE FOR YOUR NIGHTS SPENT IN CAMP

The second and middle item from the caravan line of Husky tents is called Caravan 17. Its specific feature is a space of 17 square meters that combines a comfortable sleeping room for 5 people and huge entrance hall where can stay other overnights and still keeping enough space for storage of any stuff or seating. The tents hall has a fully sewn-in floor and windows on all hall walls as well as the other tents from this line. There is a main entrance and additional side entrance that enables a freedom of movement. The bearing construction combines lighter durawrap poles with firm steel poles, the result is a stable construction with a reasonable weight. This model is developed for long-term using, so you will find enough storage space there as well as output and fixation for power cable.

DIMENSIONS (W × L × H) • 325 × 360 × 210 cm
DIMENSIONS OF PACKAGE • 80 × 36 × 33 cm

CARAVAN 22

COLOR: 1 green

INCREDIBLE 22m² SPEAKS FOR EVERYTHING

The third and biggest model from Caravan line, called Caravan 22, offers an area 22m². This unique space fits Caravan 22 for your weekend home. This tent has 2 rooms in total, the first one for 5 people and the second one, easily detachable, for the other 2 people. The space of the rooms enable to have 7 people there but the big space of vestibule easily allow more of your friends or family members to stay overnight there. The tunnel construction offers great space throughout the tent in which you can enter two entrances. The standard is fully sewn-in polyethylen groundsheet, ventilation windows, as well as plenty of storage space. There is a set of steel and plastic pegs with hammer for easy set up of tent included in the equipment. The bearing construction combines lighter durawrap poles with firm steel poles, the result is a stable construction with a reasonable weight. This model is developed for long-term using, so you will find enough storage space there as well as output and fixation for power cable.

DIMENSIONS (W × L × H) • 325 × 650 × 210 cm

DOWN - a sleeping bag line characterised by a common kind of filling- down. It is high quality natural kind of filling which provides unusual thermal comfort and great insulating properties. It has lower weight, smaller volume and longer life-time against sleeping bags with synthetic filling. This all make them perfect into most demanding climatic conditions. Besides the filling, there are used top quality fabrics, branded zipper YKK and other equipment typical for Husky such as reflective points, inner heat flap, hood adjusting, anti-slippery straps and others.

PREMIUM - a line in Husky's sleeping bag collection. The name itself suggests the features of the sleeping bags. It combines the very best into two new models. Popular and successful insulation by Invista mixed with new Husky branded 3D-LiteFill® insulation, which is very light and warm. This combination ensures the best thermal comfort and optimal weight. Premium used fabrics and accessories in a combination with special luxury design are a matter of fact.

EXTREME - a sleeping bag line characterised by ultimate features, excellent workmanship, branded materials and special solutions such as antiskid straps, foot pouches and oblique zippers. As the name suggests, EXTREME series sleeping bags are designed for extreme conditions with very low temperatures.

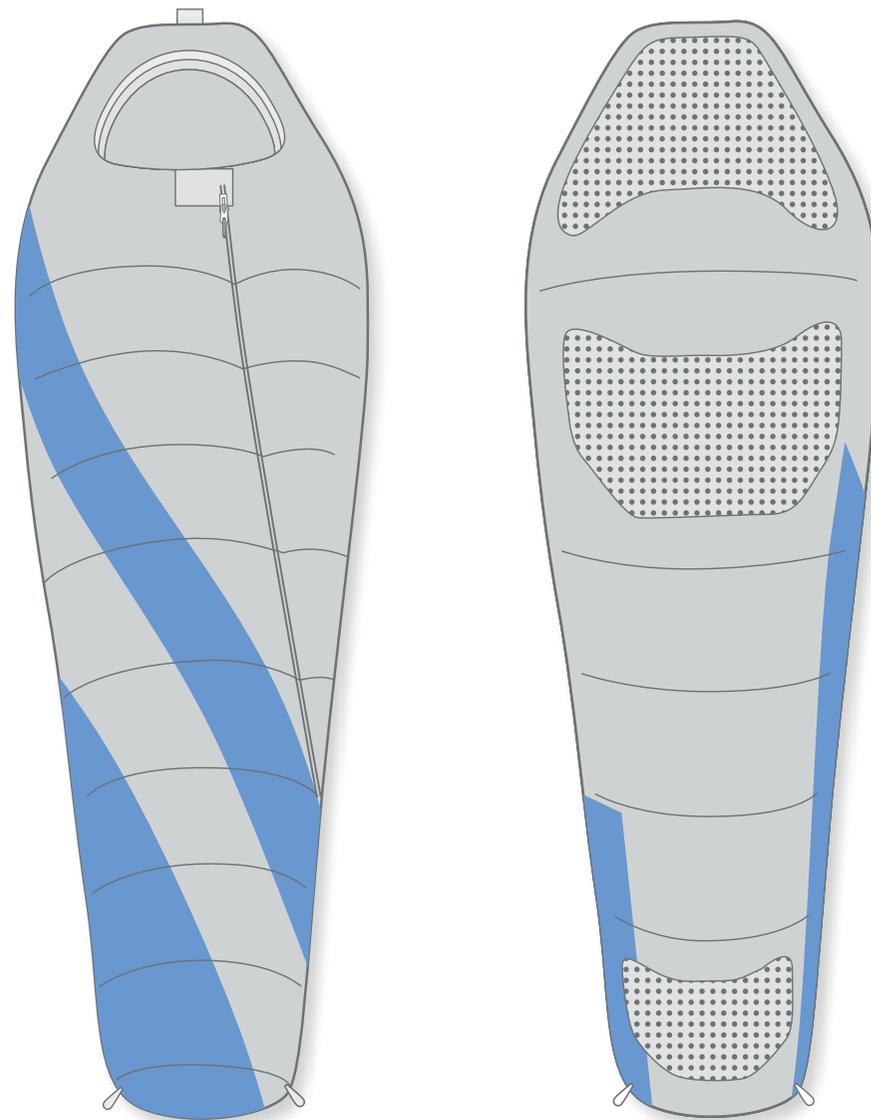

COMFORT - a sleeping bag line for demanding users who require maximum comfort, high-quality branded materials and a sufficient range of thermal properties. All the sleeping bags in this series offer an expanded area around the shoulders and interesting components such as air ventilations and antiskid straps.

OUTDOOR - the sleeping bags manufactured by HUSKY within the OUTDOOR line are our most universal sleeping bags, which meet the requirements of most customers. It offers an extensive variety of technical combinations, specific solutions and colour options designed specifically for water sportsmen, women, children or hikers, maintaining superior quality and an acceptable price level.

MIKRO - a line of sleeping bags designed specially for customers who require minimum volume and weight while maintaining sufficient thermal properties. High quality lightweight materials and superior craftsmanship are used to achieve this objective.

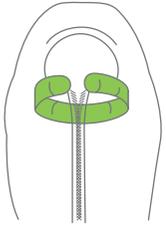

QUILT - this range of sleeping bags enables complete opening thanks the classical rectangular cut. This is a comfortable and very spacious sleeping bag solution, suitable for everyone who prefers the advantages of classical design with high variability of usage. Moreover, thanks to the wide temperature scale of offered models there is no limit for using our quilt sleeping bags and everyone can find the best to suit their needs.

KIDS - this range of sleeping bags is specially designed for the youngest users. There are models with classic mummy pattern, but also quilted sleeping bags for those children who prefer to use a blanket. You get the blanket easily when open the zipper of quilted sleeping bag. Some types of mummy sleeping bags offer additional tweaks, such as the possibility of extending or shortening the sleeping bags due to lower detachable body parts. Kids sleeping bags are designed to meet requirements of technical skills, comfort as well as unique look.

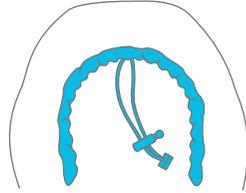

VELCRO INNER HEAT COLLAR

in the hood that prevents the catching of clothes

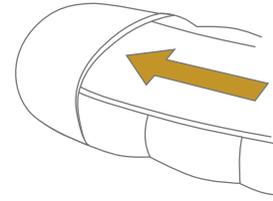

HOOD

the specially shaped hood ensures minimal escape of heat in head area, this effect is further improved by a drawstring on the hood.

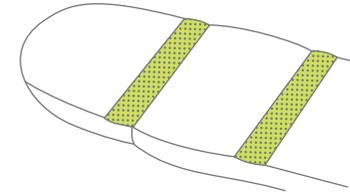

LARGE PILLOW POCKET

for mat (clothes can be placed inside to create a pillow or the mat may be placed inside to prevent sliding down while sleeping)

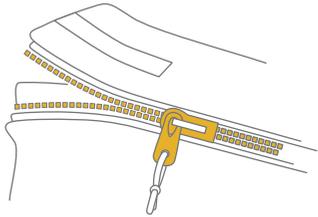

ANTI-SLIDING STRAPS

prevent the sliding of the sleeping bag from mat

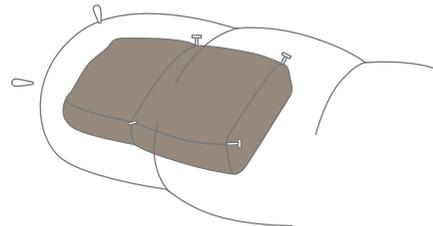

ERGONOMIC ZIPPER

with a flap (the flap prevents the escaping of heat and trapping of fabric by the zipper). Zipper length to two thirds of the body reduces thermal loss in foot area puller.

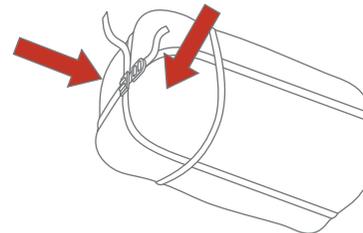

FOOT POUCH

ensures a second thermal layer for the feet. Outer hoods for hanging the sleeping bag

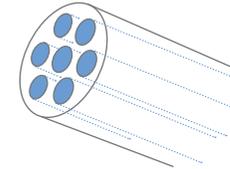

COMPRESSION SACK

with two compression straps to help decrease the volume of the sleeping bag by 40%

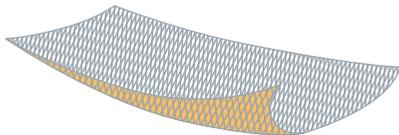

FILLING

2-layer filling with branded 7-channel fibre insulates well while retaining sufficient breathability

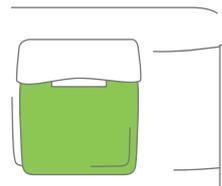

RIPSTOP FABRIC

great mechanical damage resistance features and prevents further ripping even when torn

OUTER POCKET

for accessories, inner zipper pocket

DOPY -25°C

SLEEPING BAGS • DOWN

DRAPE -20°C

SLEEPING BAGS • DOWN

YOUR PARTNER FOR EVERY ADVENTURE

Sleeping bag Dopy -25, a new model in the sleeping bags collection filled by goose down. This is an excellent sleeping bag designed for demanding climatic conditions. The sleeping bag uses a high quality fabrics for shell fabric as well as for inner fabric. The anti-slippery straps on the back side of body that protects the bag from sliding off the mat. In the standard equipment, you will find warm collar, outer and inner pockets as well as two-way branded YKK zipper with safety locker. Dopy -25 is a high-ended sleeping bag that will become indispensable.

A DOWN SLEEPING BAG TO -20°C

Drape -20 is a sleeping bag filled by goose down. High quality filling ensures great insulation and thermal features in a combination with low weight and small package. A mere 1250 grams and extreme temperature specification to -20°C are a unique combination for outdoor sleeping. All this is of course complemented by an inner collar, outer and inner small pocket, warmed YKK two-way zippers and anti-slippery straps. Drape is simply a great newcomer which you just have to get.

1 BODY OF SLEEPING BAG

Inside of sleeping bag, there is inner velcro heat collar which is around neck and shoulders. It is possible to adjust it and close the inner space of sleeping bag and thus avoid the escape of heat and protect the shoulders against getting chilled. Of course, there is also possibility to pull the hood off to a maximum and thus it can avoid following heat escape.

2 ANTI-SLIPPERY STRAPS

Anti-sliding straps serve to prevent the sliding of sleeping bag from the mat. It is a fabric with rubber dots which prevent to sliding. These straps of fabric are stitched on the back side of sleeping bag, in areas where is the biggest pressure of body.

SMALL SACK

The total weight of this sleeping bag is very low, only 830g. This weight and dimensions of package make this sleeping bag unique. We reach this low weight of sleeping bag by using of high quality of fabrics. The filling of this item is goose down, 90/10, 700cuin. It is high quality natural kind of filling. Specification 90/10 is the proportion of powder down and small feathers which ensure long-time featheriness. 700 cuin means so-called fullness which says about the elasticity and expansivity of feathers or ability to takes up maximal volume. The used outer fabric is Nylon Tactel 20D. It is synthetic fibre which has a combination of great properties like firmness, low weight, water resistance and breathability. The sleeping bag is also equipped by compression sack. It protects the sleeping bag against dirt, damage and wet. Compression straps help to decrease the total volume of package to minimum.

MUMMY SHAPE

This sleeping bag has an anatomical mummy shape. This kind of shape copies human body to get low weight and get the best thermal insulating properties as well. The sleeping bag has side zipper opening with an ergonomical shape and inner heat flap. This heat flap covers the zipper and avoid the escape of heat from inside of sleeping bag. Besides it it prevents the catching of clothes. Of course there are also inner and outer pocket for small things.

DINIS - 10°C

ULTRALIGHT DOWN SLEEPING BAG

It is really an ultralight sleeping bag in a small package, which will simply be lost in your backpack, but at the same time it will easily keep you warm. Of course, it features the necessary accessories like inner collar, anti-slippery straps, two-way YKK zipper or inner and outer small pocket. The Dinis sleeping bag will become indispensable fellow on your journeys.

SLEEPING BAGS • PREMIUM

PROUD IS OUR PRIDE IN BETWEEN HUSKY SLEEPING BAGS...

This is the tip of the sleeping bags. Used filling combines the quality of international corporation DuPont, namely it is 7-channel Invista Qualofill which guarantees great volume called LOFT effect and new insulation 3D-LiteFill®. This is a microfiber that stands out great heating power combined with low volume and weight. This combination of used fibres guarantees superior thermal comfort and great loft with acceptable weight package. The matter of fact is using of perfect materials that are very soft to the touch but firm at the same time. This all is underlined by unique timeless design, as is customary at Husky. The comfort is enriched by using of anti-slippery straps.

THE QUALITY WHICH IS ON THE TOP...

This sleeping bag is the brother of Proud -29°C and shares all its properties. There is a mixture of two kinds of insulation used. One is Invista Qualofill, 7-channel and the second is 3D-LiteFill® that can guarantee a great combination of loft effect, thermal comfort and low weight. There are excellent materials that are very soft to touch and firm enough as well used. The sleeping bag was developed together with prominent designers and therefore it can boast by unique and timeless outlook and accessories like anti-slippery straps, outer and inner pocket and inner hood pocket which serves to cushion.

QUALITY DOWN FROM HOLLOW FIBRES...

A sleeping bag for the most demanding mountain expeditions that perfectly substitutes the comfort of a high-quality down fill with the seven channel hollow fibre Invista Quallofil. The bag is equipped with all the typical features of the Husky Extreme product line, including an insulated foot pouch. Additionally, it boasts a unique insulated two way zipper, which is untraditionally short, but more functional. Inside the Anapurna you simply do not care that outside temperatures are absolutely freezing.

„ENJOY“ MEANS HAVE A FUN...

Enjoy sleeping bag is ideally suited to extreme activities that require light, but at the same time excellent equipment. The first-rate material Invista Quallofil, a seven-channel hollow fibre, insulates excellently and simultaneously guarantees sufficient air transfer. Additionally, thanks to anatomical zipping, the Enjoy is very practical. Its comfort is enhanced by a removable insulated foot pouch, slip-resistant strips, and a compression sack. Enjoy Long = extended bag version.

PLEASURE FROM SLEEPING IN WARMTH AND SAFETY...

The Emotion is an alternative to the Enjoy sleeping bag. Its insulation qualities, thanks to the used high-quality Invista Quallofil material make it an essential part of the winter equipment of every experienced highlander. The high standard of comfort offered by this sleeping bag is also enhanced by a removable insulated foot pouch and slip-resistant stripes. The Emotion is small in weight, but big in performance.

① INNER HEAT COLLAR

Husky Ladies Motion is also equipped by inner heat collar which is placed above shoulders. This collar is lockable by velcro and it is possible to adjust it according to stopper according to need. So the space inside of sleeping bag can be closed and heat air can stay inside. The shoulders also keep protected against getting chilled.

② HOOD

On the edge of the hood, there is a tunnel with the string for adjusting. So you can completely close the hood. This adjusting can be regulated by stopper. Total closing of hood is used often in cold and windy weather conditions. The inner space is closed and whole inner space keep without escape of heat air. In the inner side of hood area, there is a big velcro pocket. This is used for cushion by pillow or any clothes which is available at that time.

③ POCKETS

The pockets are necessary equipment of sleeping bag. The model Husky Ladies Motion has outer pocket, placed on chest part. This pocket is lockable by velcro that makes the opening very easy and quick. The second zipper pocket is placed on inner side of hood. Both pockets are great storing space for small things.

④ FABRIC

The outer fabric of this model is 40D 240T Tactel Nylon Ripstop. It is 100% nylon, so it is synthetic fibre, which is light, firm, water-resistant and breathable. Besides it has Ripstop adjustment. Ripstop is in weaving of the fabric which makes it firm. It protects against the tearing of fabric and in the case, that it even happens, it will avoid further unstitching. The sleeping bag has ergonomical zipper opening which starts in the middle of body and goes to the side and ends in the lower third of body to avoid the escape of heat air. On the upper part of zipper opening there is an additional velcro flap with reflective strap.

LADIES MOTION -20°C

COOL LADIES SLEEPING BAG...

This ladies sleeping bag in Extreme line of Husky is a great fellow for all situations thanks its well-quality branded filling Invista QualloFil. Sleeping bag has anatomical shape designed especially for ladies and what's more there is extra layer in foot and chest area which ensures unusual thermal comfort. Excellent insulating, sufficient breathability are basic features of this item. Comfort of sleeping is intensified by micro fleece in inner side of hood. This is very soft fabric and that's why you will feel very well. The matter of fact are anti-sliding straps, inner and outer pocket and compression sack.

FOR THREE SEASONS OF GUARANTEED PEACEFUL SLEEP...

Peaceful sleep from spring through to winter is guaranteed by the Ember sleeping bag. Its Loft effect and brilliant insulating features of the Insufil Thermo hollow fibers maintain excellent comfort, even in hard conditions and with long-term usage. In addition, it is practical in that it has slip-resistant stripes and a low weight. In its compression sack it becomes very space-saving.

AN ENEMY OF ALL COMPLICATIONS...

With this three-season model, Husky succeeded maintaining all the quality features of the Husky Extreme sleeping bag product line with the widest possible use. The used hollow fibre Insufil Thermo gives not only excellent insulation, but also significantly lower the weight of the sleeping bag. Ideal for everyone who values a brilliant balance between weight, performance, and price.

SLEEPING BAGS • EXTREME

ESPACE -6°C

A LIGHT AND WARM SLEEPING BAG REPORTS FOR DUTY...

The lightest sleeping bag in the Husky Extreme product line, filled by Insufil Thermo hollow fibers, the Espace by no means falls below the high standard of comfort reached by the rest of the product line. It is a three-season sleeping bag for versatile use. It has no competition among 1-kilogram sleeping bags – it is the absolute leader in this regard, especially among cycle enthusiasts, because of its low weight.

WEIGHT	• 990 g	EXTREME TESTED	- 6°C
SIZE OF PACKAGE	• 30 x 16 cm	LOW COMFORT	- 0°C
RECOMMENDED HEIGHT	• 185 cm	HIGH COMFORT	+ 6°C
FILLING	• 1 x 120 g/m ² Insufil Thermo	OUTER MATERIAL	• 40D 240T Tactel RipStop Nylon
CONSTRUCTION	• 1-layer	ACCESSORIES	• compression sack, anti-slippery straps
INNER MATERIAL	• Soft Nylon		

1 ZIPPER

The zipper puller enables a manipulation with zipper. Its extended part with Husky eye at the end ensures easy catching and further opening or closing the zipper according to current need. By adjusting of zipper opening, you can also regulate the heat inside of sleeping bag. For keeping warm inside, there is also warm zipper flap, inner heat collar and specially shaped hood with a drawstring. But of course, there is high-quality filling used. Inside of this sleeping bag, there is ExTherm-Pro Insulation used. It is synthetic 4-channel hollowfibre which has a great loft effect. The fibres have a layer of silicon which reduces their friction. Hollowfibres are moisture-resistant and non-allergic. The filling has a sandwich construction in two layers. This combination ensures an extreme temperature to -22°C.

2 REFLECTIVE PRINTING

The Azure sleeping bag has an unique design which shows company colours and its logo. At the part of the eye which is on chest area or on the bottom print or on velcro flap on upper part of zipper opening. All these reflective parts makes a bag visible in the dark. The next feature of this item are anti-slippery straps on the back side. These are made from rubber material which prevent sliding down from the mat.

3 BOTTOM PART

The sleeping bag Azure has an atypical length of the zipper opening. The most of mummy sleeping bags has a zipper on side of body which finishes at the same side. But Azure has zipper opening on whole side which follows on the bottom and go further to the first third of the second side of body. This element enables that you can open and use this model as quilted sleeping bag. In the case, you would like to use it as usual mummy bag, it is enough to open the zipper only to required part. Thanks to two-way zipper, there is also possible to use this length of zipper for ventilation in foot area. The upper part of zipper opening can be closed and its bottom part can be partially opened and this enables the air circulation.

ZIPPER FLAP

Along whole zipper length, there is a warm zipper flap. This flap protect the zipper against the heat escape. To avoid catching of fabric into the zipper, there is an additional fabric tape stitched on the warm zipper flap. This tape enables easy manipulation with a zipper without any snagging.

AZURE -22°C

A GUARANTEE OF COMFORTABLE SLEEP IN EVEN THE COLDEST OF WINTER NIGHTS...

The Azure is a proud representative of the Husky Comfort line. In contrast to currently existing models it is a wider anatomically shaped sleeping bag with all the advantages of four channel hollow fibers. The new distinct sleeping bag design of the Azure can not be mistaken for any other brand – it proudly carries the Husky company colours. It is also unique in that besides its mummy shape, it can be unzipped and used as a classic blanket. It will warm your bones even in frosty conditions.

WEIGHT	• 2290 g	EXTREME TESTED	- 22°C
SIZE OF PACKAGE	• 44 x 29 cm	LOW COMFORT	- 14°C
RECOMMENDED HEIGHT	• 195 cm	HIGH COMFORT	- 7°C
FILLING	• 2 x 220 g/m ² eXtherm-pro insulation, 4-channel	OUTER MATERIAL	• 40D 240T Tactel RipStop Nylon
CONSTRUCTION	• 2-layer	ACCESSORIES	• compression sack, anti-slippery straps
INNER MATERIAL	• Soft Nylon, microfleece in hood		

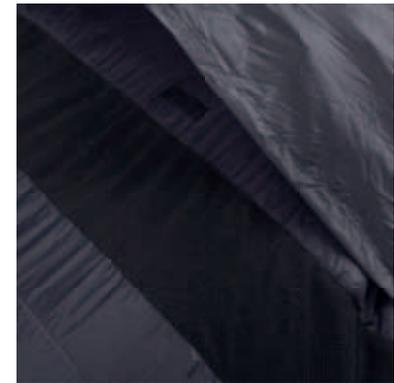

1 FABRIC

On the inner side of hood, there is used microfleece. The advantage of this fabric is its softness which is suitable mainly for head area. As the outer material of this sleeping bag, there is used 40D 240T Tactel Nylon Ripstop. It is 100% synthetic fibre that is light and firm as well as soft. It also ensures high breathability and keeps easy its colour and shape. Ripstop adjustment supports firmness and reduces the rupture.

2 CUSHION

On the back side of sleeping bag, there is a pocket in upper third of body. This pocket serves for fixation of sleeping mat and possible cushion in head area. This pocket is easy to close and open by velcro. On the back side, there are also anti-slippery straps which protect sleeping bag against sliding down from the mat. These straps are made from elastic fabric with rubber dots which have anti-sliding properties.

3 BOTTOM OPENING

The sleeping bag has a compression sack. This is primarily used for protection of sleeping bag against getting dirty or against getting wet. Compression straps can decrease the total volume of bag to a minimum. The sleeping bag should be cramped to sack, instead of rolling. The sack serves for transport purposes, for storing at home, there is necessary to keep the sleeping bag freely to get long life time. At the bottom side, there are stitched two loops which could be used for hanging it up.

STORAGE

The sleeping bag has usual zipper opening which starts at the bottom part of hood and goes through the side to bottom of body. On the other side, there is an additional zipper in the bottom third of sleeping bag which serves to regulate warm inside. Thus the bottom part of sleeping bag can be easily ventilated.

APOLLO LADIES -20°C

THE COMFORTABLE APOLLO LADIES SLEEPING BAG REPRESENTS YET ANOTHER PROUD MEMBER OF THE COMFORT LINE.

Its distinct design is focused mainly on ladies and ensures them a uniqueness by its outlook. The matter of course is keeping of anatomical shape, anti-slippery straps, reflective points, inner and outer pocket, fleece in the inner hood and more advantages. One's comfort while using the Apollo model is further enhanced by the ventilation option that is granted by a short zipper in the lower portion of the sleeping bag.

WEIGHT	• 2270 g	EXTREME TESTED	- 20°C

AURUS - 18°C

SLEEPING BAGS • COMFORT

ARMY - 17°C

SLEEPING BAGS • OUTDOOR

THE GOLDEN STANDARD AMONGST SLEEPING BAGS...

The more than triple season Aurus sleeping bag guarantees comfortable sleeping conditions even in freezing conditions. Thanks to the excellent insulating characteristics of the eXtherm-pro four channel hollow fiber insulating system, the Aurus maintains ideal comfort even in rough conditions. This sleeping bag is also equipped with a wider central part, traction strips, a compressive storage sack and, last but not least, a ventilation option in the lower portion of the bag that is resolved with a short zipper.

FOR THOSE WHO WOULD RATHER NOT BE SEEN...

The Husky Army sleeping bag guarantees above standard three season comfort. Its appearance is primarily meant for trips into the great outdoors, water tourism as well as for hiking. Its camouflaged appearance will help you disappear into the bush, which is often appreciated by photographers and others who should deem it necessary to blend in with their surroundings.

MAGNUM -15°C

REAL CALIBER FOR BAD WEATHER...

The Magnum sleeping bag from the Husky Outdoor sleeping line is for versatile use from spring to winter while wandering around in the great outdoors. Its high quality fill is composed of polyester four-channel Hollowfibre for maximum fluffiness (LOFT), not to mention the fact that this material does not absorb any moisture. You will spend the night in it comfortably, even at 10 degrees below zero. The special outer material, Nylon Taffeta, coated with a waterproof layer, makes the Magnum a real heavy caliber response to bad weather.

MONTI -11°C

THIS SLEEPING BAG IS SOOO SPACIOUS...

The Monti greatly resembles the Magnum, mainly in materials used, but also in its versatility of use during the three main hiking seasons. The Husky team added a lateral zipper to this model, which facilitates the adjustment of the sleeping bag width according to your needs. Creating enough space is not a problem with the Monti, for instance by joining two sleeping bags together, after a demanding hike, even a small piece of baggage can be hidden here.

MONTELLO -9°C

SLEEPING BAGS • OUTDOOR

MAESTRO -7°C

SLEEPING BAGS • OUTDOOR

WILL NICELY COMPLEMENT YOUR WEEK LONG MOUNTAINOUS HIKE WITH WARMTH WHILST YOU SLEEP..

The materials used on a regular basis in the whole Husky Outdoor sleeping bag product line guarantee a high standard of quality and comfort, even in the models which are not primarily designed for extreme conditions. Simply put, that is what the Montello model offers – a traditional three-season sleeping bag with an ideal balance between weight and volume versus performance. It is also able to cope with ground frost, and therefore is suitable for multi-day hikes in mountainous terrain.

A MASTERPIECE FOR PEACEFUL SLEEP..

The production materials used in the Husky Outdoor sleeping bag product line guarantee a high standard of comfort even in models that are not primarily designed for extreme conditions. Ground frost, for example, is no threat for the Maestro and can be disregarded by its owner. A classic, for versatile use in all three hiking seasons.

MANTILLA -5°C

SLEEPING BAGS • OUTDOOR

MINI 0°C

SLEEPING BAGS • MIKRO

A FULFILLED DREAM AFTER A TIRESOME HIKE...

The production materials used in the whole Husky Outdoor sleeping bag product line guarantee a high standard of comfort even in the models that are not primarily designed for extreme conditions. The parameters of the Mantilla sleeping bag are a compromise between weight and warmth. While being the lightest sleeping bag in the Husky Outdoor product line, it has proven to hold its own as a three season sleeping companion.

NICE AND LIGHT!

This model of Husky sleeping bag is mainly designed for cyclists. The Mini is the second lightest and smallest of all Husky sleeping bags, while of course maintaining the highest possible quality of materials - ultralight fiber Supreme Loft and waterproof Nylon Taffeta and abrasion resistant Nylon Ripstop. The benefits of the Mini sleeping bag will not only appeal to cyclists, but also to those who would like to travel light in summer.

-----------------------	--------------

1 MATERIALS

The total weight of sleeping bag is 1100g and it belongs to cycling range of sleeping bags too. This low weight is thanks to used materials and insulation layer. The outer fabric is a combination of Nylon Taffeta and Ripstop Nylon. It is 100% synthetic fibre which is very soft but elastic and firm as well, The main features are light weight, loft effect, resistance to wind and water. Ripstop adjustment supports firmness and reduces the rupture. Insulating layer is Supreme Loft. It is a synthetic polyester hollow fibre with a tube shape. The fibres have a layer of silicon which reduces their friction. An advantage is a high level of thermal comfort. The fibres are moisture-resistant and non-allergic.

2 EXTENSIBLE BOTTOM PART

The right size of sleeping bag is very important. For small body, it is difficult to warm big space and on the other hand, small sleeping bag is not comfortable and compressed insulation layer doesn't heat. The Husky sleeping bag Musset has length 210 cm which is suitable for person with 185 cm of height but there is an additional zipper in bottom part of sleeping bag which enables to extend the total length by 15 cm. So the sleeping bag is designed for people with total height to 200 cm.

CONSTRUCTION

The sleeping bag Musset has a zipper opening on side of body. Its upper part has a velcro flap which protects the zipper against the spontaneous opening. This flap has a reflective stripe on its outer side. The sleeping bag has two-way zipper for easy manipulation which is always placed on side but it is possible to choose the side of the zipper. Either left or right position. The advantage of left and right zipper is a possibility to join them into one big sleeping bag. This model has also necessary inner and outer pocket for storage of small things.

MUSSET -3°C

This model of Husky sleeping bag is mainly designed for cycle touring. The excellent synthetic hollow fibre, Supreme Loft, guarantees perfect thermal insulation while maintaining the lightest possible weight of the sleeping bag. During the hours of morning dew one is protected thanks to the use of waterproof Nylon Taffeta. A fundamental feature of the Musset is the possibility of extending the length of the sleeping bag by about fifteen centimeters thereby obtaining sufficient space for taller individuals or for any other reason.

WEIGHT	• 1100 g	EXTREME TESTED	- 3°C
SIZE OF PACKAGE	• 28 x 17 cm	LOW COMFORT	+ 3°C
RECOMMENDED HEIGHT	• 185 + 15 cm	HIGH COMFORT	+ 8°C
FILLING	• 1 x 150 g/m ² Supreme Loft	OUTER MATERIAL	• 70D 190T Nylon Taffeta / 300T Nylon baby ripstop
CONSTRUCTION	• 1-layer	ACCESSORIES	• compression sack
INNER MATERIAL	• Soft Nylon		

1 THERMAL CONDITIONS

The sleeping bag has a breathable lining Soft Nylon which is firm and soft and can release a moisture from inside of sleeping bag. In the inner part of bag, there is inner pocket and also care label with use and care instruction to keep long life time. To keep right thermal comfort, it is needed to choose suitable clothing for a night in the sleeping bag. Mainly in colder conditions, it is necessary to have dry clothing. We recommend to have at least two layers of clothes, for example underwear and additional warm layer. The given temperatures are sense of direction. The big role play current physical and mental conditions and also current climatic conditions like humidity, wind, altitude. The next important thing is using of sleeping mat and a tent.

2 SIZE AND WEIGHT

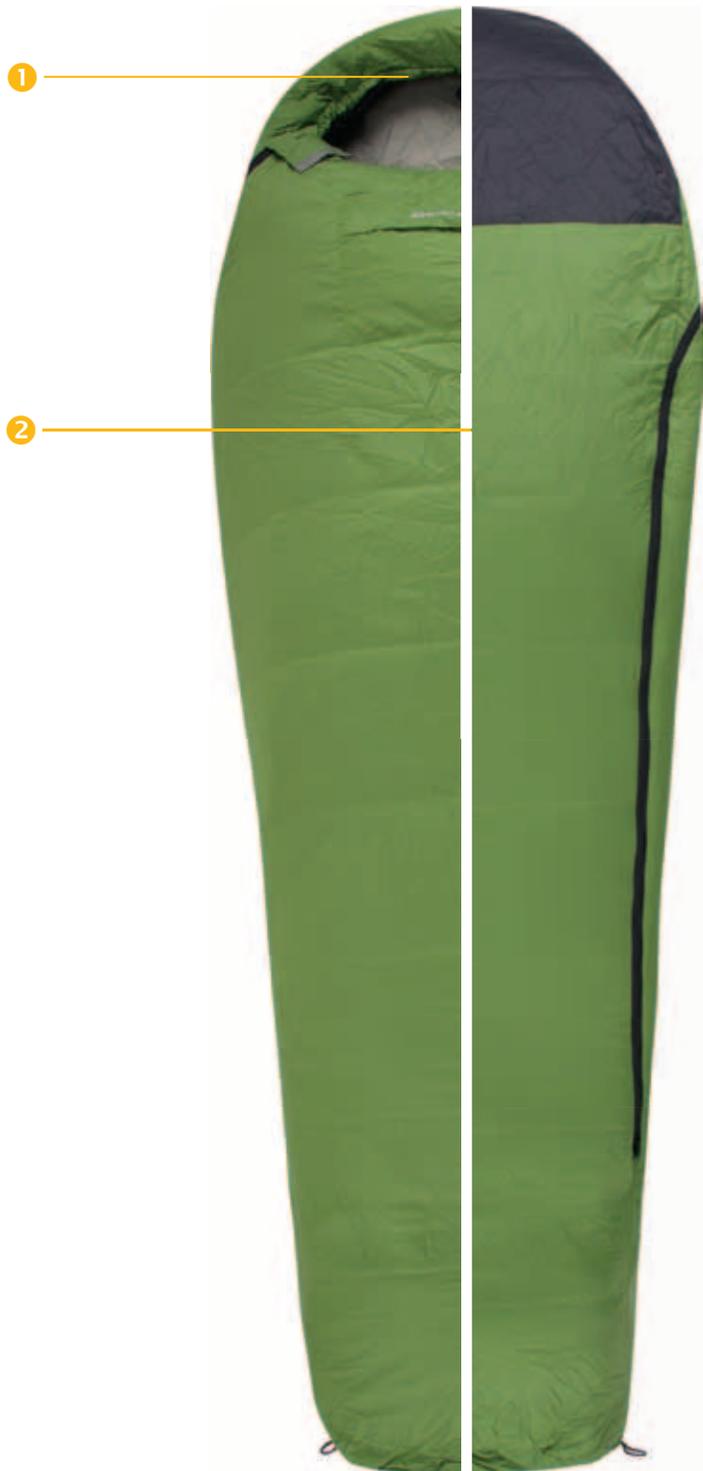

The total weight of Micro sleeping bag, only 600g, is extra light weight and that's why this model find an use everywhere, where is needed minimal volume (the size of package is only 23x12,5cm) and low weight, mainly in cycling use. The low weight is a result of a combination of used materials. It is one layer insulation layer of Supreme Loft and light weight Nylon Tactel Ripstop.

3 ZIPPER OPENING

The sleeping bag Mikro has zipper opening on a side of body. Two-way zipper is easy to open or close by zipper puller which makes the slider longer to make the manipulation as easy as possible. The sleeping bag has an anatomically mummy shape which copies a human body to get the lowest possible weight and best thermal insulating properties.

MIKRO +2°C

DREAM FOR CYCLING...

The lightest Husky sleeping bag will surprise you by its extra light weight. This advantage ensures that you will want to take the MIKRO sleeping bag everywhere with you. It will become the best friend on your cycling trips. Only 600 g speak for everything!

--------------------	--

INNER MATERIAL	• Polypongee, Microfleece
-----------------------	---------------------------

SLEEPING BAGS • KIDS

1 INNER SPACE

For maximum thermal comfort, there is inner velcro heat collar which is adjustable and protect the shoulders as well as the rest of inner space of sleeping bag. In the inner part of hood, there is used microfleece fabric which is very soft and can keep warm easily. Even it is a kids sleeping bag, there is inner and outer pocket as well. Necessary equipment of this sleeping bag are reflective points that are mostly included at the front part of sleeping bag.

2 DETACHABLE BOTTOM PART

Kids sleeping bag Husky Kids Magic has a unique construction that can be set according to the height of the child. Therefore it is possible to use this model from an early age to adolescents. The principle is the extensible part of sleeping bag. If you want to get the shortest possible length, 150 cm (or children to 125 cm), then you will simply unclip the bottom of the bag and cover the resulting hole by an additional lid. The separate bottom part can serve as a additional foot bag which is an additional thermal layer for legs. If a child grows, simply remove the lid from the bottom and put there the bottom sack again and this you will get sleeping bag with length 180 cm which is suitable for children to 155 cm. On inner side of bottom zipper, there is a flap as well as on the main side zipper. This flap protect the zipper space against warm air escape.

3 BOTTOM LID

The bottom lid of sleeping bag can serve as a pillow too.

ULTRALIGHT backpacks are the collection of bags HUSKY brand, which are in terms of volume the cross-section of several categories, but the main feature is a modern design, lightweight materials, as well as the emphasis on functionality. Back system of ULTRALIGHT backpacks, which are produced with volume from 30 to 60 liters, is based on anatomically shaped adjustable panel - EVA moulding. Of course, this line is a series of different cool things, such as hooks for various equipment, pockets or rain cover. ULTRALIGHT backpacks are the ideal companion for weekend and longer trips into the countryside and the mountains.

EXPEDITIONS backpacks take up a large volume of cargo (from 35 to 75 liters) and are primarily designed for longer trips into the countryside and the mountains. Emphasis is placed by these bags, in particular, to a sophisticated back system and duralumin reinforcement on some with big volume to ensure maximum comfort wear, regardless of surroundings or weather conditions. Expeditionary bags are a part of different sophisticated fixations (e.g. skis, ice-axe and other equipment). Matters of fact are quality materials with high resistance to abrasion and water are in this category.

TOURIST BAGS are a significant group of bags HUSKY brand and are most universal group of backpacks in terms of the use. Their usage can begin at the level of practical help for short walks, and may end with features of ski bag. Strong emphasis by tourist backpacks is placed on quality of back system, the practical division of space through the pockets, the various hooks and, ultimately, to design, since many tourist bags find their usage as well as stylish backpacks for school and city.

CYCLING and **IN-LINE** backpacks are - as the name itself suggests- a series of backpacks designed for cycling and running on in-line skating. Special tapered construction of backpack anatomically shaped and ventilated back system guarantees experience of driving on the road or in the field. Side pockets for bottles and outlet for water bladder on the bag are guarantees of adequate supply of water without unnecessary stops. The safety of its bearer is ensured by reflective elements of these bags.

CITY is a series of bags - as the name suggests - designed for practical use as a school bag or as an assistant in the movement of the urban jungle. For this reason, the emphasis is - outside of high-quality construction - on the design of the backpack. Backpacks from City and School line have also many pockets. We don't forget even security dimension and therefore they are equipped by reflective components for greater security of its owner.

OFFICE backpacks - you do not need to be a workaholic or a computer zealot to need to move your notebook safely. Backpacks of our laptop series are a perfect way. Each bag of this line is equipped with a closeable internal pocket for your notebook, inner organizer and the pocket for player with outlet for earphones. The security dimension meets reflective points.

WAISTBAGS and multifunctional waist pouches from Husky are real practical help in the countryside and the urban jungle. You can choose from small case for documents directly on the body to the multifunctional waist pouches with anatomically shaped waist belt designated for example for a camera. You can find the pocket for MP3 player with headphones outlet or pockets for mobile phone on some waistbags.

TRAVEL and **SPORT BAGS** - It does not matter if you need to transport sports apparel on the way to the training or personal belongings during the business trips in bag. Good-quality sports and travel bags from HUSKY satisfy your requirements not only by its functionality but also by design.

RAINCOVER

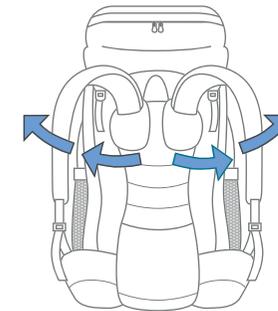

TWO-WAY ZIPPERS

enable comfortable and two way manipulation of zipper

VENTILATION

is ensured by anatomical shaped back panel

DAMR

DOUBLE ADJUSTABLE MESH REINFORCEMENT SYSTEM

Anatomically shaped back system with possible size adjustment offers easy manipulation with adjusting of required high of back system and enables the using of this backpack to any kind of human body. The back side of this system is made from 3D breathable mesh which is anatomically shaped in order to fits tightly to body and enables air ventilation as well. The aluminium reinforcements on inner inner side of backpack make it firm and distribute the weight in between the shoulder straps and waist belt.

DER

DOUBLE ADJUSTABLE EVA REINFORCEMENT SYSTEM

A comfortable high adjustable back system is anatomically shaped. It is made from EVA moulding and 3D breathable mesh. The high of this back system is simply possible to set up according to need. The used material fits tightly to body and enables necessary ventilation thanks to shaped back side. The firmness of this system and right weight distribution is ensured by two aluminium reinforcements on inner side of body.

ETS

EVA THERMOFORMED SYSTEM

Anatomically shaped back system from EVA moulding is shaped to fit the back of body and to enable air ventilation as well. The outer EVA material is very soft and it adapts to shape of body. The stability of this panel is ensured by Polyethylene reinforcement in Y shape.

NBS

NET BACK SYSTEM

The net back system is unique thanks to its construction. It is fixed by two aluminium supports which hold the body of backpack in a distance from the net which fits tightly to human body. Thanks to this interspace, the air can circulate between your back and body of backpack. The next advantage is a great shape flexibility of this system.

AMS

ANATOMICAL MESH SYSTEM

Anatomically shaped back system is made of firm desk reinforcing whole back panel and of padding from 3D breathable mesh. This shaped padding fits tightly to your back and ensures good ventilation, breathability and stability.

 • steel tube with diameter ø 16mm

MARIL

DIRECTOR PADDED CHAIR WITH SMALL TABLE ON ONE SIDE AND PADDED ARMREST

WEIGHT • 3,58 kg
BEARING VALUE • 100 kg
SIZE OF PACKAGE • 82 × 54 × 15 cm

WIDTH OF SEAT • 47 cm
HEIGHT OF SEAT • 40 cm
TOTAL HEIGHT • 81 cm

MATERIAL
 • 600D Polyester with waterproof coating

FRAME
 • Aluminium tube, 30 × 16 mm

ACCESSORIES

MOAT

COMFORTABLE STEEL CHAIR WITH ARMREST WITH EVA, FOLDABLE TO COMPACT SIZE

WEIGHT • 4,2 kg
BEARING VALUE • 120 kg
SIZE OF PACKAGE • 90 × 20 cm

WIDTH OF SEAT • 50 cm
HEIGHT OF SEAT • 42 cm
TOTAL HEIGHT • 91 cm

MATERIAL
 • 600D Polyester with waterproof coating

FRAME
 • Steel tube, 25 × 12 × 1 mm

ACCESSORIES

MOON NEW

3-LEG STOOL, FOLDABLE TO COMPACT SIZE

WEIGHT • 840 g
BEARING VALUE • 100 kg
SIZE OF PACKAGE • 56 × 10 cm

MATERIAL
 • 600D Polyester with waterproof coating

FRAME
 • Steel tube with ø 19 mm

WIDTH OF SEAT • 35 cm
HEIGHT OF SEAT • 40 cm

ACCESSORIES

MARROW

LARGE CAMPING BED WITH A MAGAZINE POCKET

WEIGHT • 7,2 kg
BEARING VALUE • 120 kg
SIZE OF PACKAGE • 105 × 20 × 10 cm

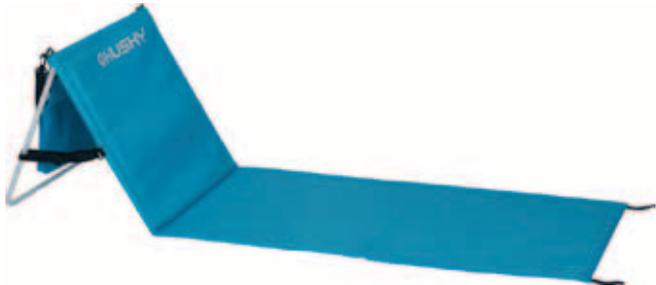

MATERIAL
 • 600D Polyester with waterproof coating

FRAME
 • Aluminium tube, 32 × 25 mm, 25 × 25 mm

DIMENSIONS • 210 × 80 × 47 cm

ACCESSORIES

ACCESSORIES

ACCESSORIES

MANOR

BEACH MAT WITH ADJUSTABLE BACKING AND BACK ORGANISER

MORTY

LIGHTWEIGHT FOLDABLE ALUMINIUM TABLE

WEIGHT • 2,20 kg
SIZE OF PACKAGE • 54 x 54 cm

DIMENSIONS • 160 x 54 cm

MATERIAL
 • 600D Polyester with waterproof coating

FRAME
 • Steel tube with ø 16 mm

WEIGHT • 2,9 kg
BEARING CAPACITY • 30 kg
SIZE OF PACKAGE • 70 x 17 cm

DIMENSIONS • 70 x 70 x 70 cm

FRAME
 • Aluminium tube with ø 19 mm and aluminium top panel

MOLAR

LIGHTWEIGHT ALUMINIUM TABLE WITH ADJUSTABLE FOOT

WEIGHT • 6,18 kg
BEARING CAPACITY • 30 kg
SIZE OF PACKAGE • 122 x 18,5 cm

DIMENSIONS • 122 x 65 x 70 cm

FRAME
 • Steel tube, 25 x 25 mm and aluminium top panel

ACCESSORIES

ACCESSORIES

COVERY

THIS BLANKET WILL BELONG TO ALL YOUR PICKNICS AND OUTDOOR ACTIVITIES

easy to pack | waterproof bottom layer | insulating sponge layer between the shell and bottom fabric ensures heat insulation and comfortable sitting

WEIGHT • 550 g
LENGTH • 130 x 150 cm
DIAMETER • 33 x 20 x 10 cm

MATERIAL
 • acrylic, sponge, EVA

SHERPA

TELESCOPIC 3-SECTION TREKKING POLES WITH GRIP IN COMBINATION OF CORK AND EVA MOULDING

STEEPLE

TELESCOPIC 3-SECTION TREKKING POLES

ACCESSORIES

ACCESSORIES

WEIGHT • 290 g (one pole)
LENGTH • 67 - 135 cm
DIAMETER • 18 / 16 / 14 mm

MATERIAL
 • aluminium 7075

TIP
 • carbon

GRIP
 • EVA moulding, cork

ACCESSORIES
 • lockable antishock, foot pad, removable snow baskets, adjustable handle strap

WEIGHT • 300 g (one pole)
LENGTH • 67 - 135 cm

 • EVA moulding

ACCESSORIES
 • foot pad, removable snow baskets, adjustable handle strap

ACCESSORIES

BENET

EASY OPERATION STOVE SUITABLE FOR HIGH MOUNTAIN

ACCESSORIES

BENCH

ULTRALIGHT GAS STOVE

POWER • 3100 W BOIL TIME • 3,3 min. GAS CONSUPTION • 230 g/h	WEIGHT • 100 g (stove) + 42 g (box) DIMENSIONS • 105 × 105 × 83 mm (open) 60 × 60 × 95 mm (packed)	POWER • 3500 W BOIL TIME • 3 min. GAS CONSUPTION • 250 g/h	WEIGHT • 70 g DIMENSIONS • 55 × 32 × 75 mm
MATERIAL • stainless steel		MATERIAL • steel (body), aluminium and copper (valve)	
ACCESSORIES • plastic box		ACCESSORIES • lightweight textile carry pouch included	

CARTRIDGE 230

PROPAN-BUTAN CARTRIDGE FOR CAMPING GAS STOVE

CAPACITY • 230 g
WEIGHT • 345 g
DIMENSIONS • 105 × 90 mm

FILLING
 • propan-butan

ACCESSORIES

TWINGO

UNIVERSAL COOKING SET WHICH IS HEAT AND FRICTION RESISTANCE

WEIGHT • 710 g

MATERIAL
 • hardened aluminium, polypropylen

THE SET INCLUDES
 • 2 pots, 2 pans, 2 spoons, 4 bowls
 (the fry pans also can be used as pot covers)
big pot: 170 × 92 mm
small pot: 136 × 78 mm,
big fry pan: 180 × 46 mm
small fry pan: 152 × 43 mm

ACCESSORIES

CUTLER

DURABLE AND STAINLESS CAMPING CUTLERY SET, THE CLIP ON THE HANDLE CAN BE USED AS A SPANNER

WEIGHT • 76 g

MATERIAL
• stainless steel

THE SET INCLUDES
• spoon, fork, knife, carbine
spoon: 185 × 13 × 2 mm, 26 g
fork: 162 × 36 × 2 mm, 20 g
knife: 162 × 22 × 2 mm, 30 g

ACCESSORIES

STROKE

COLOR: 1 grey, 2 green

COMPACT HEADLAMP WITH TWO EFFICIENT LED DIODS

possibility to set up intensity of white LED light, red LED light flashing for emergency use, free projection angle

WEIGHT • 60 g (including battery)

DIMENSIONS • 57 × 26 × 35 mm

BATTERIES • 1 × 1.5 V AA alkaline battery (included)

2 KINDS OF LIGHT
• white LED light with two modes of intensity
• red LED light for night vision and flashing for emergency use

ACCESSORIES

ACCESSORIES

SLIM

COMPACT HEADLAMP WITH TWO EFFICIENT LED DIODES

light and compact headlamp with white LED light, green LED light for reading maps or signalization and others

- WEIGHT** • 28 g (including battery)
- DIMENSIONS** • 32,5 × 39 × 29 mm
- BATTERIES** • 2 × 3 V CR2032 Button cells (included)

- 2 KINDS OF LIGHT**
 - white LED light
 - green LED light for reading maps or signalization and others

ACCESSORIES

SPIN

MULTIPURPOSE PLIERS

- TIP** • 198 g
- LENGTH OF PLIERS** • 15 cm
- LENGTH OF HANDLE** • 9,5 cm

- MATERIAL**
 - 420 stainless steel

- ACCESSORIES**
 - large blade, small blade, file, cap lifter, wood saw, screwdriver, anatomically shaped handle

ACCESSORIES

RAINER

COLOR: 1 green

PRACTICAL RAINCOVER WITH A HOOD FROM FIRM AND LIGHT POLYESTER RIPSTOP

ACCESSORIES

RAFTER

COLOR: 1 red

PRACTICAL RAINCOVER WITH A HOOD AND REAR SECTION FOR WEARING A BACKPACK

MATERIAL
• 190T Polyester, PU coating 5000 mm/cm², taped seams

SIZE
• S-M, L-XL

ACCESSORIES
• adjustable hood, front pocket, reflective points, taped seams, full-length button-through opening, elastic closure on cuffs, carry pouch

MATERIAL
• 190T Polyester, PU coating 5000 mm/cm², taped seams

SIZE
• S-M, L-XL

ACCESSORIES
• rear section for wearing with a backpack with zipper closure, adjustable hood, front pocket, reflective points, taped seams, full-length button-through opening, elastic closure on cuffs, carry pouch

ACCESSORIES

SLAP

COLOR: 1 blue, 2 black

UNIQUE SUNGLASSES WITH POLARIZED LENS

polarized lens protect the eyes by blocking glare and ensure the best visibility | 100% UV protection REVO lens anti-sliding nose pads and tips | suitable for universal and year round use

ACCESSORIES

SOLEN

COLOR: 1 black, 2 blue, 3 red

SPORT SUNGLASSES WITH POLARIZED LENS

polarized lens protect the eyes by blocking glare and ensure the best visibility | 100% UV protection anti-sliding nose pads and tips | suitable for universal and year round use

CATEGORY OF SUNLIGHT FILTER • CAT 3, UV 400

MATERIAL
• Polycarbonate

ACCESSORIES
• packable paper box, cleaning cloth

CATEGORY OF SUNLIGHT FILTER • CAT 3, UV 400

MATERIAL
• Polycarbonate

ACCESSORIES
• packable paper box, cleaning cloth

SLIDE

DESIGN SPORTS SUNGLASSES ARE YOUR FIRST AID WHEN SUN IS SHINING

suitable for year round use | lens have ANTI-FOG effect | 100% UV protection | matt finish

CATEGORY OF SUNLIGHT FILTER • CAT 3, UV 400

MATERIAL
• Polycarbonate

ACCESSORIES
• packable paper box, cleaning cloth

ACCESSORIES

ACCESSORIES

WATER BLADDER 1,5 L / 2 L

PRACTICAL WATER BLADDER FOR FLUID REPLENISHMENT

ideal for cycling, tourism or demanding hiking | the bladder is filled, put in the bag and tube passes through the output in the bag

VOLUME • 1,5l / 2l

MATERIAL
• Polyurethan, welded seams

THERMO MUG 220

COLOR: 1 black, 2 blue, 3 green, 4 red

double-walled construction | brushed stainless steel with effective colorful handle | vacuum insulation

VOLUME • 220 ml
SIZE • height 8,2 cm | ø 7 cm
WEIGHT • 86 g

MATERIAL
 • stainless steel 18/8

ACCESSORIES

THERMO MUG 400

COLOR: 1 brown, 2 red

thermo mug with double-walled construction | vacuum insulation | removeable cap | insulated plastic handle
 combination of stainless steel and rubber finish

VOLUME • 400 ml
SIZE • height 11 cm | ø 8,5 cm
WEIGHT • 185 g

MATERIAL
 • stainless steel 18/8 with rubber finished coating

ACCESSORIES

FLIP THERMO MUG 450

COLOR: 1 black, 2 blue

double-walled construction | vacuum insulation | removeable cap | insulated plastic handle | modern mat finish
| possible to use in a car bottle keeper

VOLUME • 450 ml
SIZE • height 14,5 cm | ø 8,5 cm
WEIGHT • 175 g

MATERIAL
• stainless steel 18/8 with mat coating

ACCESSORIES

FELLY THERMO MUG 450

COLOR: 1 blue, 2 red

double-walled construction | vacuum insulation | removeable cap | insulated plastic handle | combination
of stainless steel and rubber finish | possible to use in a car bottle keeper

VOLUME • 450 ml
SIZE • height 18,5 cm | ø 8,5 cm
WEIGHT • 230 g

MATERIAL
• stainless steel 18/8 with rubber finished coating

ACCESSORIES

FRESCO THERMO MUG 450

COLOR: 1 red, 2 blue

double-walled construction | thermo insulation ensured by vacuum between separate walls | anatomically shaped handle | possible to put it into bottle holder in car | antiskid and rubber coating

VOLUME • 450 ml
SIZE • height 18 cm | ø 8,5 cm
WEIGHT • 270 g

MATERIAL
 • stainless steel with rubber finished coating

ACCESSORIES

FORY PLASTIC BOTTLE

COLOR: 1 green, 2 blue

single walled construction | rubber part for easy grasp | plastic cap with handle | integrated straw inside

VOLUME • 600 ml
SIZE • height 23,3 cm | ø 7,1 cm
WEIGHT • 130 g

MATERIAL
 • plastic

ACCESSORIES

FLAGON

COLOR: 1 black, 2 red

single-walled construction | screw on and sport lid

VOLUME • 750 ml
SIZE • height 23 cm | ø 7 cm
WEIGHT • 150 g

MATERIAL
 • stainless steel

ACCESSORIES

ACCESSORIES

NEOPRENE SACK

suitable for FLAGON sport bottle | it gives it an insulating layer | zipper on side | carabine included

SIZE • height 20 cm | ø 7,5 cm
WEIGHT • 50 g

MATERIAL
 • neoprene

TENTS

Ripstop Polyester (shell)

They are synthetic fibres which make fabric and this fabric is reinforced by additional inweave called RIPSTOP. Polyester fibres are suitable and can be used for all textile products. They have high wind resistance and are stable, light and they are colour fastness and have a quick-dry effect. RIPSTOP material avoid mechanical damage and if it even happens it avoid other tearing.

Nylon 190T (inner material)

They are fibres of 100% Nylon which are really soft and elastic and firm as well. This fabric has excellent features- light weight, featheriness and breathability.

Mesh mosquito net (inner material)

It is breathable material which is used on inner tent. The construction of the fabric helps to circulating of air and thus there is excellent ventilation. Despite of perfect ventilation and softness this fabric is still enough firm.

Layered polyethylene (floor)

It is very firm material which is used especially as floor of big tents. The floor from this material is abrasion resistant and thus it is popular for family tents. The matter of fact is waterproofness which is necessary.

190T Polyester (floor)

It is polyester fabric. This is great at its firmness and it is light too and these all is big advantage by tents.

Duralumin poles (bearing poles)

Duralumin is much used material for bearing poles of construction of tent. It is firm and light material which is used mainly by expedition tents where is important each gramme.

Durawrap poles (bearing poles)

It is laminated bearing poles of construction of tent which have special polyester foil which fits closely and strenghtens the surface of poles. There is longer life-time, firmness and elasticity as well when using durawrap instead of laminated poles. In the case that the poles will be broken it will fray only at the site of a break, not along its entire length.

Polyurethan (coating)

It is the most common kind of coating which is used on tents. The information about the coating destines the high of water column and thus determines the water proofness.

Silicone (coating)

This is a very excellent protection against the moisture penetration which is lighter than Polyurethan coating. The flysheet with silicon coating is water resistant and suitable for very low temperatures.

SLEEPING BAGS

Goose Down 650 cuin (filling)

Goose down is high quality natural kind of filling which provides unusual thermal comfort. Specification 90/10 is the proportion of powder down and small feathers which ensure long-time featheriness or loft. 650 cuin means so-called fullness which says about elasticity and expansivity of feathers or ability to takes up maximal volume.

3D-LiteFill (filling)

It's going to be a top quality insulating material. The combination of hollow 3D fibres and microfibrils guarantees great thermal comfort with low weight. 3D fibers ensure high thermal comfort and microfibrils fill all interspace. Fibres are moisture-resistant and non-allergic.

Thermolite Quallofil (filling)

Patented 7-channel fibre from Invista makes for production of filling of high-quality sleeping bags. It has good insulating properties thanks to the way it is constructed of hollow fibres which trap air inside of them and creating an insulating layer. The fibres are quick-dry, light and durable. They retain warmth even when wet. They make it possible to gain high loft and retain warmth without any need to increase the weight or volume of sleeping bag.

Insufil Thermo (filling)

It is top-quality insulating filling for extreme usage. The fibres are thermally bonded without use of resin. This technology provides high loft and exceptional warmth. This kind of insulating layer is soft and lightweight and also easy to care.

Extherm-Pro Insulation (filling)

It is a synthetic polyester 4-channel hollow fibre. Thanks to their elastic twist, careful fabrication and the way they are formed, the fibres provide maximum loft so-called featheriness. Fibres have a layer of silicon which reduces their friction. Hollowfibres are moisture-resistant and non-allergic.

Hollowfibre (filling)

Hollowfibres are synthetic polyester fibres which are hollow inside and have a spiral tube shape. Thanks to their elastic twist, careful manufacture and the way they are formed, the fibres have excellent featheriness or otherwise loft effect. To keep high loft effect here is a layer of silicon which is put on the fibres and which protect their friction. Hollowfibres are moisture-resistant and non-allergic.

Supreme Loft (filling)

It is great insulating material developed in cooperation with specialists. Supreme Loft is synthetic polyester hollow fibre with tube shape. Fibres have a layer of silicon which reduces their friction. An advantage is high level of thermal comfort and excellent shape memory with keeping of low weight. Hollowfibres are moisture-resistant and non-allergic.

Tactel Ripstop Nylon (shell fabric)

It is top quality fibre from DuPont. It is going about 100% nylon constructed to be softer and more elastic than most of fibres. Its main features are light weight, featheriness, resistance to wind and water. It keeps easy its colour and shape. Ripstop adjustment supports firmness and reduces the rupture.

Nylon Taffeta (shell fabric)

They are patented fibres of 100% Nylon which are really soft and elastic and firm as well. The main feature of nylon taffeta are light weight, featheriness, resistance to wind and water. It keeps easy its colour and shape.

Polyester (shell fabric)

They are synthetic fibres. Polyester fibres are suitable and can be used nearly for all textile products. They have a high wind resistance and are stable at light. They have a quick-dry effect. They are colour fastness.

Tactel Nylon (lining)

It is a patented fibre from DuPont. It is going about 100% Nylon fibre which is light firm and soft as well. Advanced technology of fabrication ensures good weight properties and high breathability of made fabric.

Soft Nylon (lining)

It is going about synthetic fibre. The typical feature of these fibres are softness and firmness as well.

Polycotton (lining)

It is going about mixture of cotton and polyester fibres. The fabric from these fibres is pleasant for a touch and it doesn't crease so much like cotton.

Polypongee (lining)

It is a mixture of polyester fibres and chinese silk. Fabric from these fibres is soft and very pleasant for a touch.

Fleece (lining)

It is 100% polyester knitted fabric which is brushed from one side. This fabric is very pleasant for touch and has warm properties.

BACKPACKS

EVA moulding (back system)

This is a special moulding from EVA material which is anatomically shaped. This material assimilates to every shape of back and thus it fits well. The advantage of this material is its memory. In the case that the backpack assimilates exactly to your back then it will fit all the time.

Nylon (shell fabric)

It is going about synthetic fibre. The typical feature of these fibres are softness and firmness as well.

Ripstop Nylon (shell fabric)

Light, breathable fabric resistant against the rupture thanks the Ripstop adjustment. This material has a very good UV protection.

Ripstop Polyester (shell fabric)

They are synthetic fibres. Polyester fabric has a good resistance to light, against weather and they are quick dry. They are colourfast. The Ripstop adjustment will stop ripping in the case of rupture of fabric.

Cordura (shell fabric)

Cordura is a patented material made by Invista. It is a special polyamide fabric with extremely high abrasion resistance and is also durable in tension and cut. This is achieved by the hotair texturization of the fabric's surface (thin outer fibres are connected by hot air to form thicker ones, thus creating a surface that feels more like thick cotton fabrics). The water column resistance is significant.
